SUMMARY

Actively Computer Engineering student in 6th semester, having practical experience in academic projects, including web development, database management, and machine learning. Passionate about problem-solving and learning emerging technologies. Happy to find an internship that would enable me to put my technical skills to good use, and to develop professionally.

PROJECTS

ONLINE MOVIE TICKET BOOKING SYSTEM (FRONTEND)

- Designed and developed the user interface for an online movie ticket booking system using [technologies, e.g., HTML, CSS, JavaScript]. Created responsive and userfriendly layouts for seamless navigation and booking experience.

IMAGE CLOUD STORAGE SYSTEM

- Built an image cloud storage platform using MongoDB for database management. Designed efficient data handling for storing and retrieving images, ensuring scalability and fast access. Implemented features for secure and organized image storage.
